1. Non-solar hour capacity of the substations have been considered same as solar hour access capacity of the corresponding substation.
2. For REGS/RHGS connected through electrical system of conventional plants, only solar and non-solar access has been indicated. No margins are being indicated for such entities. List of such entities is attached at Annexure-I.
3. Additional generation approved under Regulation 5.2 are indicated separately in Annexure-II of the list. Same shall be considered for allotment of solar/non-solar hour access against corresponding connectivity applications subject to fulfillment of requisite conditions/compliances under Regulation 37.10 (d).
4. DSP/Standalone ESS grantees are not considered for solar-hour access as no injection is envisaged from such entities under Solar hours.
5. The margins are indicative in nature and the connectivity for solar/non-solar hour access shall be granted as per the detailed system studies after receipt of the application.
6. All the entities are requested to check the corresponding details as per the in-principle/final grant of connectivity and intimate in case of any discrepancy to CTU within 10 days.

^Applications whose grant is revoked and are presently subjudice

Details of solar and non-solar hour access to entities granted in-principle and final grant of connectivity through electrical system of thermal generation stations
